ONE LEAF+ Sustainable Shipping Service

ONE's Roadmap to Meet Net-Zero by 2050

Carbon Management

Transition into a low-carbon economy

Operational Efficiency

Be the most operationally efficient maritime container carrier

Green Investment

Invest in green hardware, technologies and talents to improve emissions reduction

Alternative Fuels

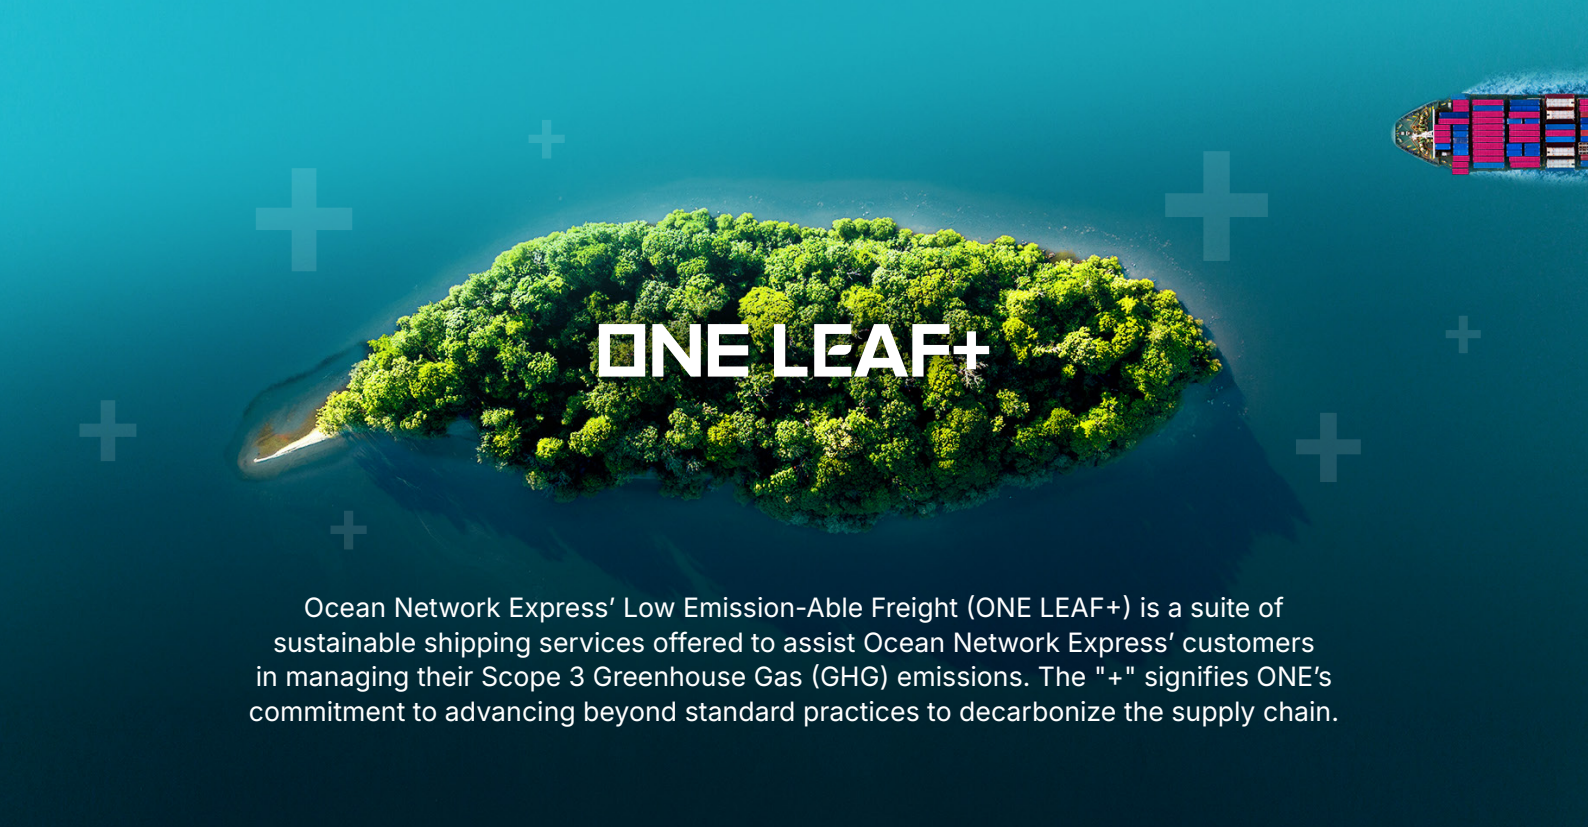

Develop a transitional plan and build infrastructure for sustainable shipping fuels

Ecosystem Building

Collaborate with cross-functional stakeholders to decarbonize the shipping industry

ONE LEAF+

Ocean Network Express' Low Emission-Able Freight (ONE LEAF+) is a suite of sustainable shipping services offered to assist Ocean Network Express' customers in managing their Scope 3 Greenhouse Gas (GHG) emissions. The "+" signifies ONE's commitment to advancing beyond standard practices to decarbonize the supply chain.

Key Facts

Savings generated are completely disentangled from the vessel consuming biofuels (B24,B30).

ONE can sell "as if" the vessel carrying customer shipment was burning purely biofuel (B100).

B100 will generate approx 84% Co2e savings.

ONE may quote on B100 (84%) or B50 (42%) basis or even lower up to 10%, according to customer preferences.

Offer & Pricing

Emissions are calculated on a well-to-wake basis x TEU.

Emissions are calculated on a well-to-wake basis x TEU.
Through ONE LEAF+ (UCOME) we can abate from **84% down to 10% of CO2e savings**, according to customer's preferences.

Price is created per TON/TEU based on formula.

For detailed pricing information, **please contact your local sales representative** or find out more on www.one-line.com/en/all-transportation-solutions/green-solutions.
